FOREWORD

This pamphlet contains a record of military prime contract awards of \$10,000 or more in fiscal years 1974 through 1976 which are assignable by state and census region.

Two types of information are presented in this pamphlet. In Part "A", data are shown for all military prime contracts by state and census region, and individual tables are shown for each state breaking out total procurement according to 25 major categories of supplies, equipment and services.

Part "B" covers procurement for research, development, test and evaluation (RDT&E) work by state and census region. These amounts are included in Part "A". The RDT&E total for each state is subdivided to show awards to educational institutions, other nonprofit institutions, and business firms.

It is emphasized that prime contract data are not a measure of the total volume of defense work that is performed within a state, because they do not reflect the very substantial amount of subcontract funds that may flow into and out of the state. About half of the prime contract dollars for major hard goods, and unknown proportions of other types of procurement, are subcontracted by the prime contractor.

In general, the state data are based on the location of the plant where the product will be finally processed or assembled. For contracts where companies assign the work to more than one

plant, the location is the address of the plant where the greater part of the work is done or where the management responsibility is centered. When this cannot be determined, the contracts are assigned to a "not distributed by state" category and are excluded from this report. The amounts not distributed by state consist principally of all contracts and purchases below \$10,000 each but also include other contracts which for security reasons could not be assigned to a state. Beginning in fiscal year 1973, contracts for the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) were included for the first time in DoD procurement statistics. These contracts are also included in the not distributed by state totals. The amounts not distributed by state were as follows:

<u>Fiscal Year</u>	<u>\$Billion</u>
1974	5.1
1975	6.0
1976	5.7

Some special characteristics of the data on prime contract awards by procurement program category should be noted:

The Electronics category includes all electronics and communications equipment which is separately procured under prime contract. In the case of missiles and aircraft, electronics work is often an integral part of the assembly prime contract, and therefore is not separately identified as electronics in the prime contract statistics.

Weapons, whether for use in ships, tanks or aircraft, are separately procured and separately reported.

Contracts for all other types of equipment and parts, and for repair, maintenance, overhaul, modification and other services, which can be identified with one of the specified program categories are assigned to that category. For example, the installation or check-out of equipment at ballistic missile sites is recorded as missile work in the state where the site is located. (The contract for manufacture of such equipment is reported according to the location of the manufacturer's plant). Aircraft, missile or other program contracts, therefore, may be reported in states where there are no weapon assembly plants, but where bases, laboratories, or suppliers of instruments, parts or support equipment may be located.

The dollar volume shown for each category includes research, development, test or evaluation (RDT&E) work associated with it. The scope of RDT&E includes the following activities:

Research: All effort directed toward increased knowledge of natural phenomena and solution of problems in the various sciences, but exclusive of efforts directed to prove the feasibility of solutions of problems of immediate military importance of time-oriented investigation and developments. This work is done primarily by universities with some by in-house laboratories and industry.

Exploratory Development: Effort directed toward the solution of specific military problems short of major development projects. This may vary from time-oriented applied research to advanced bread-board hardware, study programming, and planning efforts. It is pointed towards

specific military problem areas with a view toward developing possible solutions and determining their characteristics. This work is widely distributed to in-house laboratories and industry, with some to universities.

Advanced Development: All projects which have moved into the development of hardware for experimental or engineering test.

Engineering Development: Development programs being engineered for service use but not yet approved for procurement or operation. This work is done principally by industry.

Operational Systems Development: Effort directed toward development, engineering, and test of systems which have been approved for production and service employment, but otherwise having the same characteristics as engineering development programs.

Management and Support: Effort in support of installations or operations required for general research and development use, such as test ranges and maintenance support of laboratories.

Issued Annually by
Office of the Secretary of Defense
Directorate for Information Operations and Control
November 29, 1976

HIGHLIGHTS

- * U. S. dollar total for Military Prime Contract Awards up \$1,630 million in fiscal year 1976. Major regional increases were in the West North Central (\$1,013 million), Pacific (\$764 million), and South Atlantic (\$151 million) Regions. The Middle Atlantic Region showed the largest decrease (\$270 million). (Table I)
- * Regional distribution of the U. S. Military Prime Contract Award total shows largest share of awards in Pacific (27.7%) and Middle Atlantic (14.2%) Regions. (Table I)
- * States with major increases in dollar volume of Military Prime Contract Awards were: California (+\$1,041 million), Missouri (+\$934 million), and Virginia (+\$401 million). States with major decreases were: New York (-\$440 million), Connecticut (-\$436 million), and Washington (-\$348 million).
- * The Pacific Region led in four programs while the East North Central, South Atlantic, and West North Central Regions each led in one program. The Pacific Region received 47.1% of the awards for Missile and Space Systems, 33.6% for Electronics and Communication Equipment, 28.8% for Weapons, and 27.1% for Aircraft. The East North Central Region received 64.3% of awards for Tank-Automotive, the South Atlantic Region received 26.1% for Ships, while the West North Central Region received 22.9% for Ammunition. (Table II, Chart II)
- * Awards to California contractors were highest in eight procurement programs. Awards ranged from 11.5% of U. S. total for Construction to 42.4% of total for Missile and Space Systems. (Table IIIA)
- * RDT&E dollar awards up \$548 million (8.8%) from fiscal year 1975 level. Major increases Pacific (+\$262 million), and West South Central (+\$142 million) Regions. Major decrease in Middle Atlantic (-\$36 million) Region. (Table VI)
- * California received 43.0%, Massachusetts 8.1%, and Washington 6.4% of the Military Prime Contract dollars awarded for RDT&E in fiscal year 1976. (Table VI)
